

FMC-04

Designed for heavy-duty displays, the AG Neovo FMC-04 is an easy to move and adjust floor mobile cart for training or presentation applications.

The FMC-04 floor mobile cart, working with AG Neovo wall mount kit (LMK-04), features easy-movement and durability. The smart cable management structure and lockable wheels keep cable organized and ensure the display remains secure. Landscape and portrait display orientation is also available for versatile applications, especially for large touch screen. The FMC-04 is ideal for heavy-duty displays in public and multi-user environments for training or presentation purpose.

Dimensions (Unit: mm)

- > Durable design for multi-user environments
- > Landscape or portrait display orientation
- > Display height adjustable up to 1,810 mm (centre display)
